

Native Plant Sale

**Saturday, June 1, 2024
Whitehall Farm
4633 US Route 68 N
Yellow Springs
9:00 am to 12:00 pm
Rain or Shine**

Plants available on a first come, first served basis and are subject to availability.

No reservations or presales

CONTENTS

Wildflowers & Other Perennials

p. 3- 45

Anise Hyssop
Aster, Heart-Leaved
Aster, Heath
Aster, Side-Flowering
Aster, Skyblue
Aster, Smooth Blue
Beardtongue, Calico
Beardtongue, Foxglove
Beardtongue, Hairy
Blazing Star, Prairie
Blazing Star, Rough
Blazing Star, Savana
Blue False Indigo
Blue Vervain
Boneset
Cardinal Flower
Celandine Poppy
Clover, Purple Prairie
Clover, White Prairie
Compass plant
Coneflower, Great
Coneflower, Green-Headed
Coneflower, Grey-Headed
Coneflower, Orange
Coneflower, Purple
Coneflower, Sweet
Coneflower, Tennessee
Cup Plant
Eastern Bluestar
Evening Primrose, Common
Fern, Christmas
Fern, Ostrich
Golden Alexanders
Golden Wingstem
Goldenrod, Blue-stemmed
Goldenrod, Early
Goldenrod, Ohio
Goldenrod, Riddell's
Goldenrod, Showy
Goldenrod, Zig-Zag
Great Blue Lobelia
Indian Pink
Iris, Blue Flag
Iris, Southern Blue Flag
Ironweed, Common
Joe Pye Weed
Joe Pye Weed, Hollow
Joe Pye Weed, Sweet
Mayapple
Milkweed, Common
Milkweed, Poke
Milkweed, Prairie
Milkweed, Rose
Milkweed, Showy
Milkweed, Spider
Milkweed, Whorled
Mint, Hairy Wood
Mint, Mountain
Mint, Slender Mountain
Monkey Flower
Nodding Onion
Obedient Plant
Prairie Sundrops
Prickly Pear Cactus
Royal Catchfly
Sunflower, Early
Sunflower, Western
Swamp Rose Mallow
Tall Bellflower
Tall Coreopsis
White Snakeroot
White Turtlehead
White Wild Indigo
Whorled Rosinweed
Wild Bergamot
Wild Columbine
Wild Ginger
Wild Hyacinth
Wild Petunia, Hairy
Wild Petunia, Smooth
Wild Quinine
Wild Senna
Woodland Stonecrop
Yarrow, Common

Grasses & Sedges

p. 47- 50

Indian Grass
Pennsylvania Sedge
Pretty Sedge
Purple Love Grass
Sideoats Grama
Sweet Flag
Upright Sedge

Trees & Shrubs

p. 52 - 68

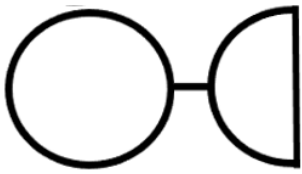

Birch, Yellow
Black Chokeberry
Blackgum
Buttonbush
Crabapple, Sweet
Cranberry, Highbush
Dogwood, Flowering
Dogwood, Grey
Dogwood, Red Osier
Elderberry, American Black
Filbert, American
Hickory, Bitternut
Hickory, Shagbark
Ninebark
Oak, Northern Red
Oak, Scarlet
Oak, Shingle
Oak, Swamp White
Pawpaw
Persimmon, Common
Plum, American
Serviceberry, Downy
Serviceberry, Juneberry
Serviceberry, Shadblow
Serviceberry, Smooth
Spicebush
Sumac, Smooth
Sumac, Staghorn
Viburnum, Nannyberry
Willow, Prairie
Willow, Pussy
Willow, Scarlet
Winterberry
Witchhazel, Vernal

Go to page 69 for a complete list of botanical names.

Wildflowers & Other Perennials

These are in 3.5 inch pots
unless otherwise noted.

Anise Hyssop

Conoclinium coelestinum

\$6 / 3.5 in. pot

Benefits bees, butterflies
and hummingbirds

Deer resistant

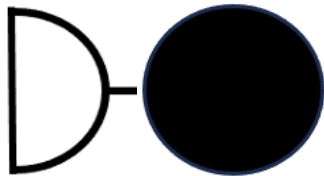

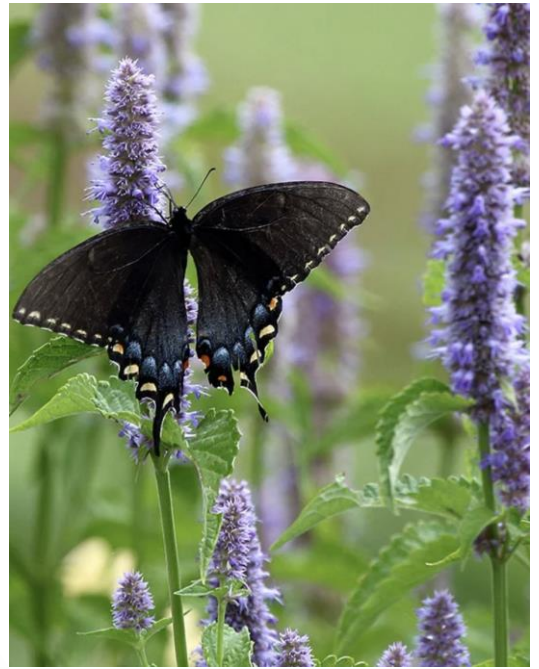

Blooms: June - September

Full to part sun

Soil: Medium to dry; drought tolerant
once established

Height: 2 - 3 feet

Spread: 12 - 16 inches

Aster, Heart-Leaved

Symphiotrichum cordifolium

\$6 / 3.5 in. pot

Benefits bees, butterflies
and other pollinators

Deer resistant

Blooms: September-October

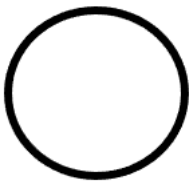

Part sun to full shade

Soil: Average to rich, well-drained

Height: 1 - 3 feet

Spread: 18 - 24 inches

Aster, Heath

Symphiotrichum ericoide

\$6 / 3.5 in. pot

Benefits bees & butterflies ; host plant
for Pearl Crescent and Field Crescent
Butterflies

Deer resistant

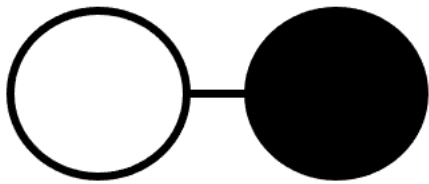

Blooms: September-October

Full sun

Soil: Dry, rocky, sandy, well-drained

Height: 1 – 2 feet

Spread: 8 - 12 inches

Aster, Side-Flowering

Symphiotrichum lateriflorum

\$6 / 3.5 in. pot

Benefits bees, butterflies & other
pollinators

Deer resistant

Blooms: August-October

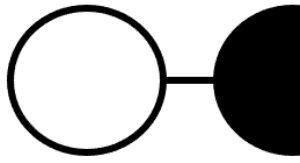

Full sun to shade

Soil: Medium wet to medium dry

Height: 1 – 3 feet

Spread: 12 - 24 inches

Aster, Skyblue

Symphyotrichum oolentangiense

\$6 / 3.5 in. pot

Benefits birds, bees, butterflies & other insect pollinators

Deer resistant

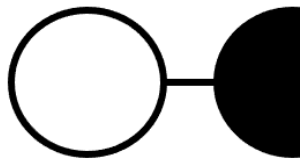

Blooms: August-October

Full sun to part shade

Soil: Medium to dry, well-drained

Height: 2 – 3 feet

Spread: 18 - 24 inches

Aster, Smooth Blue

Symphyotrichum laeve

\$6 / 3.5 in. pot

Benefits bees, butterflies & other insect pollinators; host to Pearl Crescent butterfly

Deer resistant

Blooms: August-October

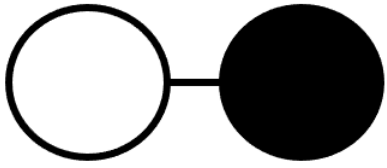

Full sun to part shade

Soil: Sandy to clay loam, medium to dry

Height: 2 – 4 feet

Spread: 2 – 3 feet

Beardtongue, Calico

Penstemon calycosus

\$6 / 3.5 in. pot

Benefits bees, bumblebees; attracts hummingbirds

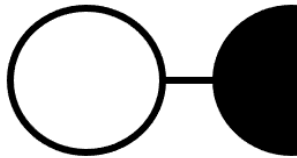

Blooms: June, July

Full sun to shade

Soil: Medium to medium wet, well-drained

Height: 1 to 3 feet

Spread: 6 – 12 inches

Beardtongue, Foxglove

Penstemon digitalis

\$6 / 3.5 in. pot

Benefits bees, butterflies; attracts hummingbirds

Deer resistant

Blooms: April - June

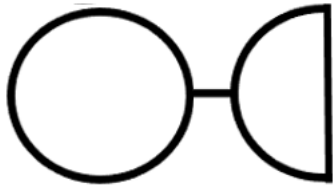

Full sun

Soil: Dry to medium

Height: 3 – 5 feet

Spread: 1 – 2 feet

Beardtongue, Hairy

Penstemon hirsutus

\$6 / 3.5 in. pot

Benefits bees, bumblebees, butterflies;
attracts hummingbirds

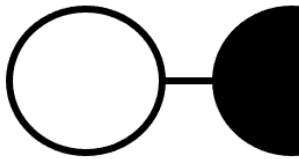

Blooms: May, June

Full sun to part sun

Soil: Dry to average well-drained

Height: 1-2 feet

Spread: 1-2 feet

Blazing Star, Prairie

Liatris pycnostachya

\$6 / 3.5 in. pot

Benefits bees, butterflies and other
pollinators; attracts hummingbirds

Blooms: July - September

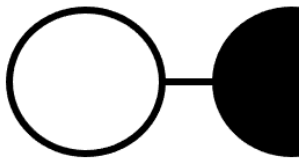

Full sun to part shade

Soil: Wet to medium

Height: 3 -5 feet

Spread: 12 - 18 inches

Blazing Star, Rough

Liatris aspera

\$6 / 3.5 in. pot

Benefits bees, butterflies and other pollinators

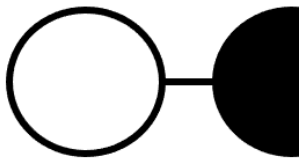

Blooms: July - October

Full sun to part shade

Soil: Medium to dry

Height: 2 - 3 feet

Spread: 12- 18 inches

Blazing Star, Savanna

Liatris scariosa

\$6 / 3.5 in. pot

Benefits bees, butterflies and other pollinators

Blooms: August - September

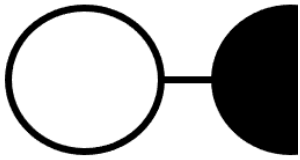

Full sun to part shade

Soil: Medium to dry

Height: 2.5 - 5 feet

Spread: 1 - 2 feet

Blue False Indigo

Baptisia australis

\$6 / 3.5 in. pot

Benefits bees and butterflies;
provides food and shelter for
beneficial insects

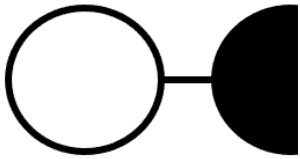

Blooms: May - July

Full sun to part shade

Soil: Medium wet to dry

Height: 3 - 4 feet

Spread: 3 - 4 feet

Blue Vervain

Verbena hastata

\$6 / 3.5 in. pot

Attracts birds and butterflies

Deer resistant

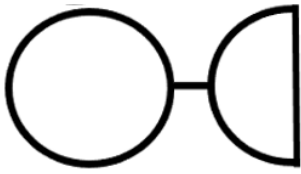

Blooms: July - September

Full sun to part shade

Soil: Wet to medium

Height: 2 - 5 feet

Boneset

Eupatorium Perfoliatum

\$6 / 3.5 in. pot

Benefits bees, butterflies and other pollinators

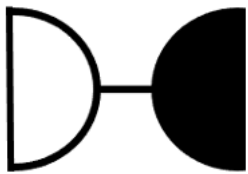

Blooms: July - September

Full sun to part sun

Soil: Wet to medium wet

Height: 4 - 6 feet

Spread: 3 - 4 feet

Cardinal Flower

Lobelia cardinalis

\$6 / 3.5 in. pot

Benefits bees, bumblebees, and other pollinators;
attracts hummingbirds

Blooms: August, September

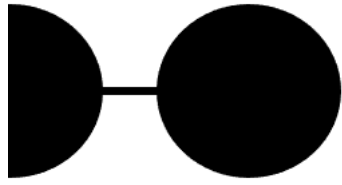

Part sun to part shade

Soil: Wet to medium wet;
good for rain gardens

Height: 1-2 feet

Spread: 24 inches

Celandine Poppy

Stylophorum diphyllum

\$6 / 3.5 in. pot

Benefits bees and early spring pollinators

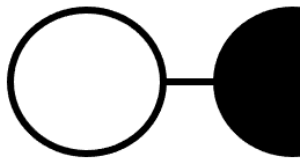

Blooms: August, September

Part shade to full shade

Soil: Medium wet to medium dry

Height: 1 - 2 feet

Spread: 10 - 12 inches

Clover, Purple Prairie

Dalea purpurea

\$6 / 3.5 in. pot

Benefits bees, butterflies and other pollinators

Blooms: July - September

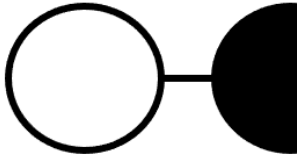

Full sun to part shade

Soil: Medium to dry

Height: 1 - 2 feet

Spread: 12 - 18 inches

Clover, White Prairie

Dalea candida

\$6 / 3.5 in. pot

Benefits bees, butterflies and other
pollinators

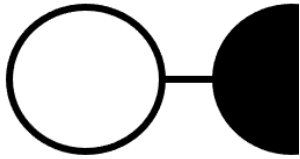

Blooms: June - September

Full sun to part shade

Soil: Medium to dry

Height: 3 - 4 feet

Spread: 2 - 3 feet

Compass Plant

Silphium laciniatum

\$6 / 3.5 in. pot

Attracts hummingbirds and butterflies

Blooms: June - September

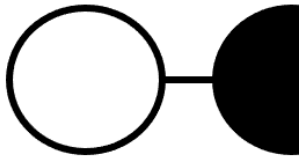

Full sun to part shade

Soil: Medium wet to dry

Height: 4 - 8 feet

Spread: 1 - 3 feet

Coneflower, Great

Rudbeckia maxima

\$6 / 3.5 in. pot

Attracts butterflies; hosts Wavy-lined
Emerald larvae

Deer resistant

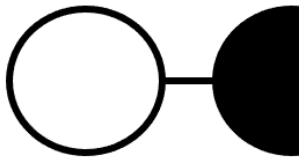

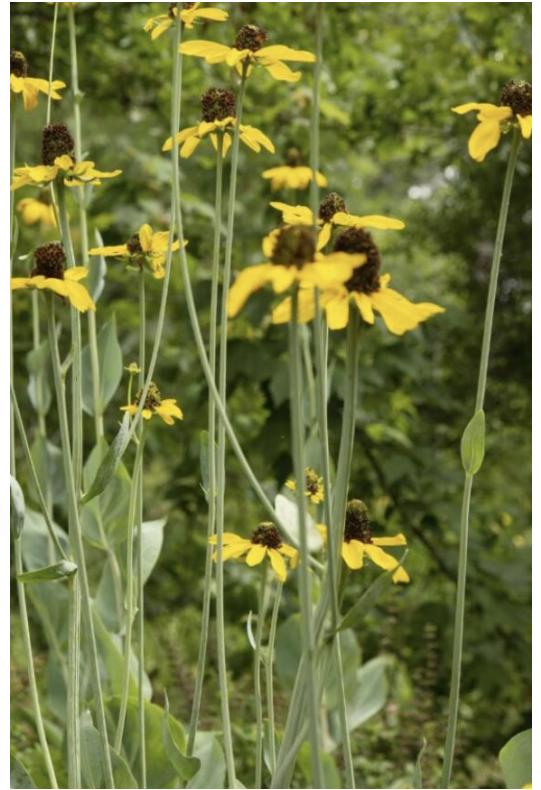

Blooms: June - July

Full sun to part shade

Soil: Medium wet to medium

Height: 5 – 7 feet

Spread: 3 – 4 feet

Coneflower, Green-Headed

Rudbeckia laciniata

\$6 / 3.5 in. pot

Benefits bees & butterflies; hosts Wavy-lined
Emerald larvae

Deer resistant

Blooms: July - October

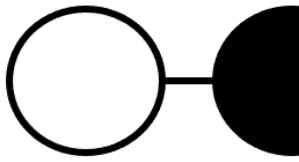

Full sun to part shade

Soil: Medium wet to medium

Height: 3 – 10 feet

Spread: 3 – 4 feet

Coneflower, Grey-Headed

Ratibida pinnata

\$6 / 3.5 in. pot

Benefits bees, butterflies and other pollinators

Deer resistant

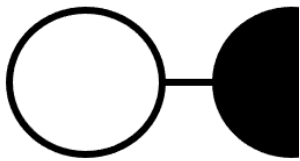

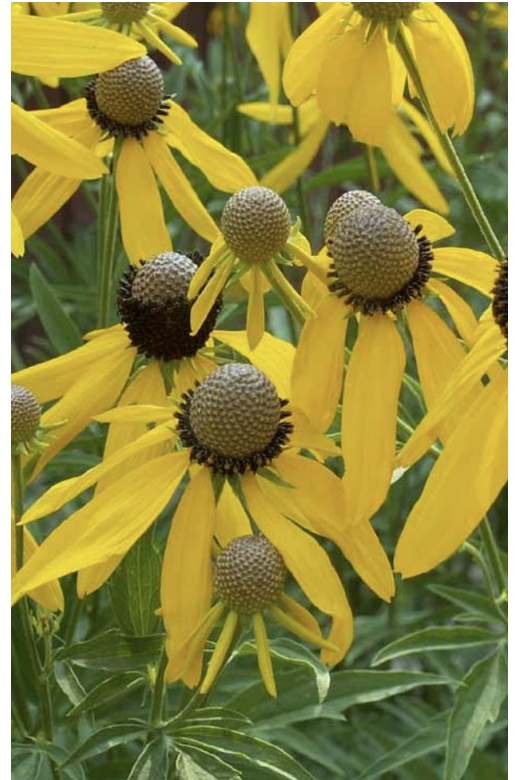

Blooms: July - August

Full sun to part shade

Soil: Medium to medium dry

Height: 3 – 10 feet

Spread: 3 – 4 feet

Coneflower, Orange (aka Black-eyed Susan)

Rudbeckia fulgida

\$6 / 3.5 in. pot

Benefits bees & butterflies

Deer resistant

Blooms: July - September

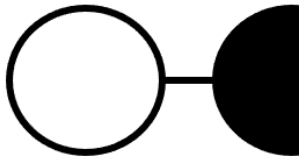

Full sun to part shade

Soil: Medium wet to medium dry

Height: 2 – 3 feet

Spread: 1 – 2 feet

Coneflower, Purple

Echinacea purpurea

\$6 / 3.5 in. pot

Benefits butterflies & hummingbirds

Deer resistant

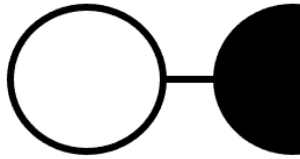

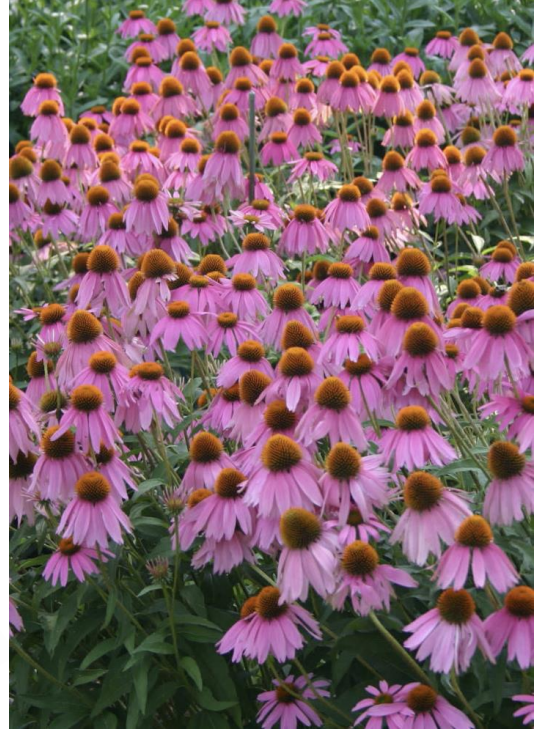

Blooms: June - September

Full sun to part shade

Soil: Average well-drained;
woodland edges

Height: 3 - 4 feet

Spread: 18 - 24 inches

Coneflower, Sweet

Rudbeckia subtomentosa

\$6 / 3.5 in. pot

Benefits bees & butterflies

Deer resistant

Blooms: August - October

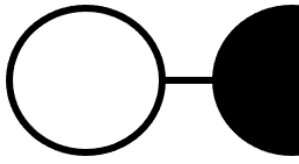

Full sun to part shade

Soil: Medium wet to medium dry

Height: 3 - 5 feet

Spread: 1 - 2 feet

Coneflower, Tennessee

Echinacea tennesseensis

\$6 / 3.5 in. pot

Benefits butterflies; larval host

Deer resistant

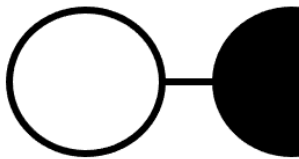

Blooms: July - September

Full sun to part shade

Soil: Medium dry - dry

Height: 1 - 2 feet

Spread: 1 - 2 feet

Cup Plant

Silphium perfoliatum

\$6 / 3.5 in. pot

Benefits bees, butterflies & other pollinators.

Like most of these flowers, birds benefit from the seeds, but also from the water captured by the leaf "cups"

Blooms: July - September

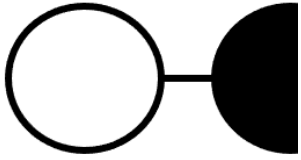

Full sun to part shade

Soil: Medium wet - medium

Height: 4 - 8 feet

Spread: 1 - 3 feet

Eastern Bluestar

Amsonia tabernaemontana

\$6 / 3.5 in. pot

Benefits bees & butterflies ; attracts hummingbirds

Deer resistant

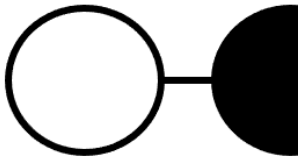

Blooms: April - June

Full sun to part shade

Soil: Moist but well drained

Height: 2 – 3 feet

Spread: 2 – 3 feet

Evening Primrose, Common

Oenothera biennis

\$6 / 3.5 in. pot

Benefits bees, butterflies and other pollinators

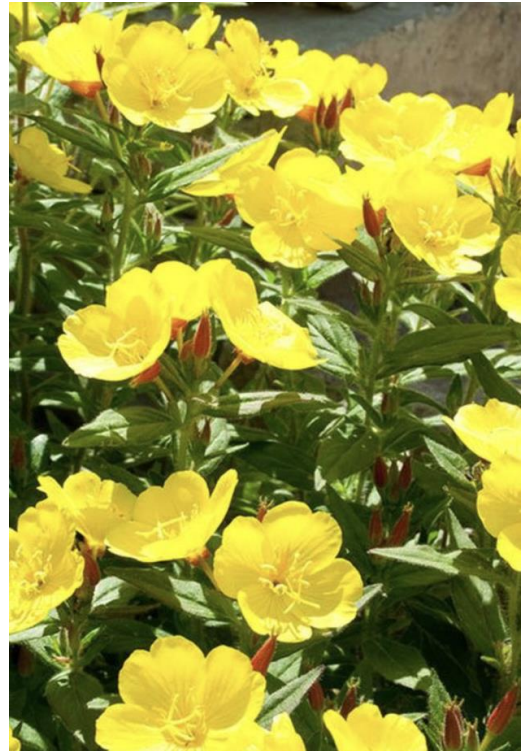

Blooms: June - October

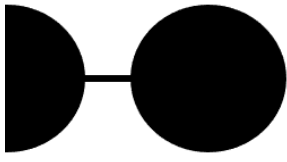

Full sun to part shade

Soil: Moist but well drained

Height: 3 – 5 feet

Spread: 2 – 3 feet

Fern, Christmas

Polystichum acrosticoidis

\$15 / gallon pot

Deer Resistant

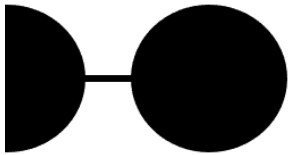

Evergreen

Part shade to shade

Soil: slightly moist, hummus;
prefers some acidity

Height: 18-24 inches

Spread: 1-2 feet

Fern, Ostrich

Matteuccia struthiopteris

\$15 / gallon pot

Deer Resistant

Part shade to shade

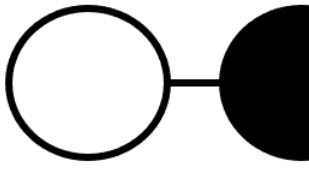

Good for stream edge

Soil: slightly moist, hummus;
prefers some acidity

Height: 3 – 6 feet

Spread: 5 – 8 feet

Golden Alexanders

Zizia aurea

\$6 / 3.5 in. pot

Benefits butterflies and other pollinators;
host plant for Swallowtail butterfly

Deer resistant

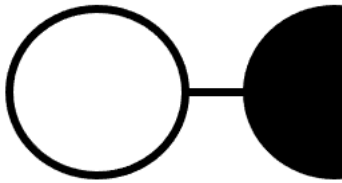

Blooms: May

Full sun to part shade

Soil: Clay, loam, sand, medium to
medium wet

Height: 2 – 3 feet

Spread: 1 – 2 feet

Golden Wingstem

Verbesina alternifolia

\$6 / 3.5 in. pot

Attracts bees & butterflies

Deer resistant

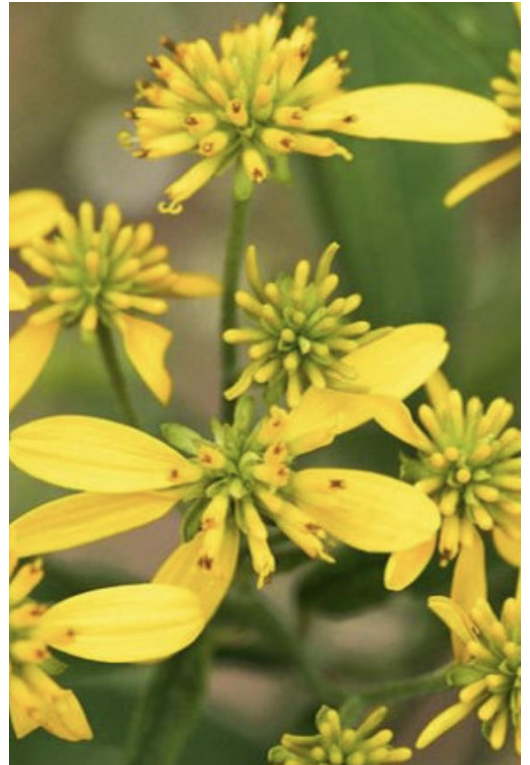

Blooms: July - October

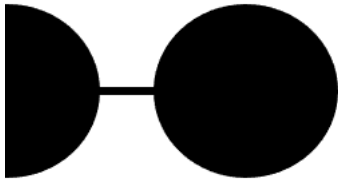

Full sun to part shade

Soil: medium to medium wet, well-
drained

Height: 4 – 8 feet

Spread: 2 – 6 feet

Goldenrod, Blue-Stemmed

Solidago caesia

\$6 / 3.5 in. pot

Attracts a wide variety of insects including bees and butterflies; provides larval food

Deer resistant

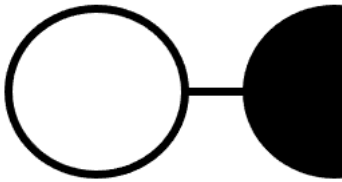

Blooms: August - October

Part shade to shade

Soil: Medium to medium dry

Height: 1.5 – 3 feet

Spread: 1 – 3 feet

Goldenrod, Early

Solidago juncea

\$6 / 3.5 in. pot

Attracts a wide variety of insects including bees and butterflies ; provides larval food

Deer resistant

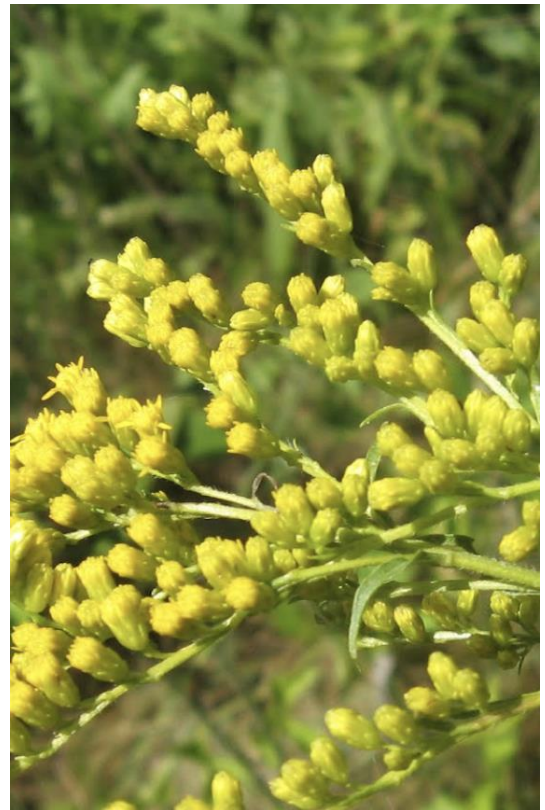

Blooms: July - September

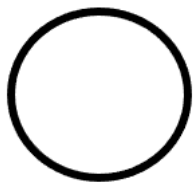

Full sun to part shade

Soil: Medium to dry

Height: 1.5 – 3 feet

Spread: 2 – 3 feet

Goldenrod, Ohio

Oligoneuron ohioense

\$6 / 3.5 in. pot

Attracts a wide variety of insects including bees and butterflies; provides larval food

Deer resistant

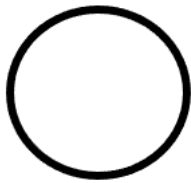

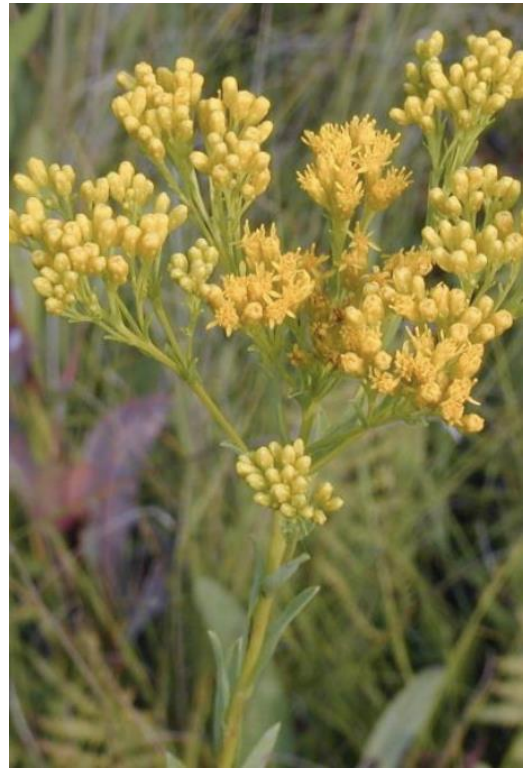

Blooms: July - September

Full sun

Soil: Medium to wet

Height: 1.5 – 3 feet

Spread: 1 – 3 feet

Goldenrod, Riddell's

Oligoneuron riddellii

\$6 / 3.5 in. pot

Attracts a wide variety of insects including bees and butterflies, beneficial insects

Deer resistant

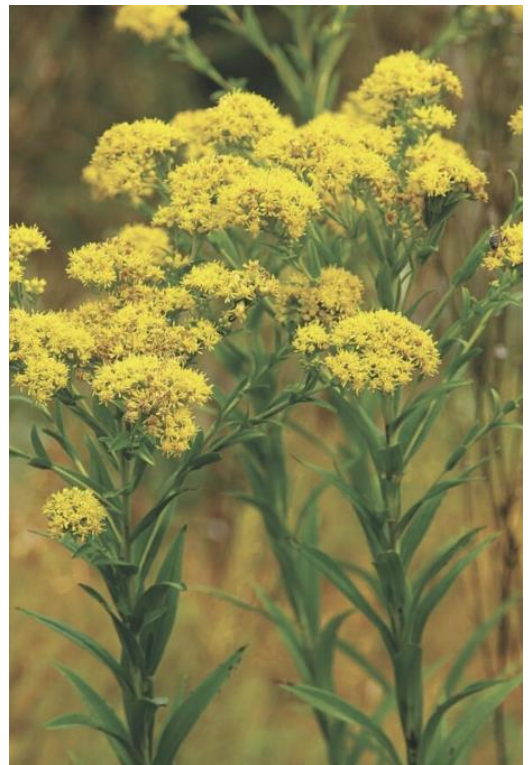

Blooms: August - October

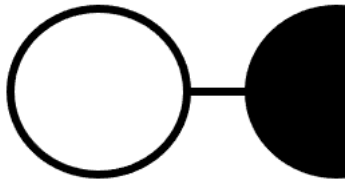

Part shade to shade

Soil: Wet to medium wet

Height: 2 – 3 feet

Spread: 1 – 2 feet

Goldenrod, Showy

Solidago speciosa

\$6 / 3.5 in. pot

Attracts a wide variety of insects
including bees and butterflies

Deer resistant

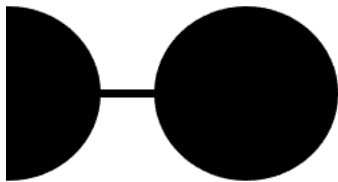

Blooms: September - October

Full sun to part shade

Soil: Dry to medium, well-drained

Height: 1 – 3 feet

Spread: 2 – 3 feet

Goldenrod, Zig-Zag

Solidago flexicaulis

\$6 / 3.5 in. pot

Benefits butterflies, bees and other
pollinators; host for many moths

Deer resistant

Blooms: September - October

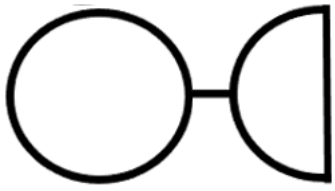

Part shade to shade

Soil: dry to moist, well drained

Height: 1 -2 feet

Spread: 18 inches

Great Blue Lobelia

Lobelia siphilitica

\$6 / 3.5 in. pot

Attracts a wide variety of insects including bees and butterflies ; provides larval food; attracts hummingbirds

Deer resistant

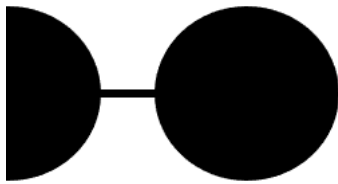

Blooms: August - September

Full sun to part sun

Soil: Medium to wet; clay loam or sand

Height: 1 – 3 feet

Spread: 12 – 18 inches

Indian Pink

Spigelia marilandica

\$6 / 3.5 in. pot

Attracts hummingbirds

Deer resistant

Blooms: April - June

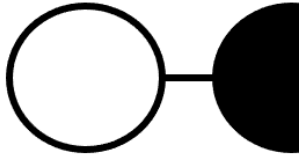

Part shade to shade

Soil: Medium to medium dry

Height: 18 – 30 inches

Spread: 2 feet

Iris, Blue Flag

Iris versicolor

\$6 / 3.5 in. pot

Attracts butterflies and hummingbirds

Deer resistant

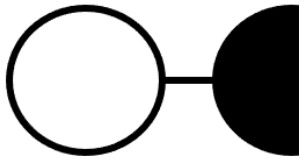

Blooms: May - July

Full sun to part shade

Soil: Medium wet to wet

Height: 24 to 30 inches

Spread: 24 to 30 inches

Iris, Southern Blue Flag

Iris virginica shrevei

\$6 / 3.5 in. pot

Attracts butterflies and hummingbirds

Deer resistant

Blooms: May - July

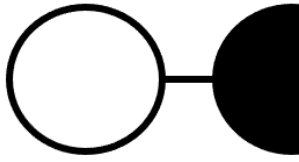

Full sun to part shade

Soil: Medium wet to wet

Height: 15 - 40 inches

Spread: 18 - 24 inches

Ironweed, Common

Vernonia fasciculata

\$6 / 3.5 in. pot

Benefits butterflies and insect pollinators

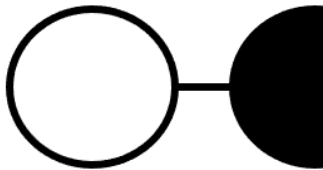

Blooms: July - September

Full sun to part shade

Soil: Medium to medium wet

Height: 4 – 6 feet

Spread: 1.5 – 3 feet

Joe Pye Weed

Eutrochium maculatum

\$6 / 3.5 in. pot

Benefits bees, butterflies and other pollinators

Deer resistant

Blooms: July - September

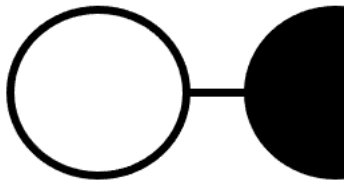

Full sun to part shade

Soil: Wet to medium wet

Height: 3 – 9 feet

Spread: 2 – 4 feet

Joe Pye Weed, Hollow

Eutrochium fistulosum

\$6 / 3.5 in. pot

Attracts a wide variety of insects
including bees and butterflies

Deer resistant

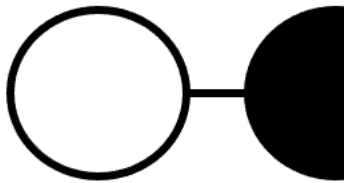

Blooms: August - September

Full sun to part shade

Soil: Moist to wet

Height: 7 – 10 feet

Spread: 3 – 4 feet

Joe Pye Weed, Sweet

Eutrochium purpureum

\$6 / 3.5 in. pot

Attracts a wide variety of insects
including bees and butterflies

Deer resistant

Blooms: July - August

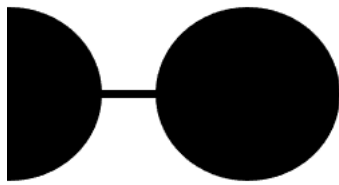

Full sun to part shade

Soil: Medium wet to medium dry

Height: 4 – 6 feet

Spread: 2 – 3 feet

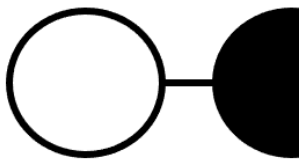

Mayapple

Podophyllum peltatum

\$6 / 3.5 in. pot

- Flowers visited by bumblebees
- Produces an edible fruit eaten by box turtles and other wildlife
- Juglone tolerant (can plant under black walnut trees)
- Deer resistant
- Blooms: May - June
- Full sun to part shade
- Soil: Medium to medium dry, rich soil
- Height: 12 inches

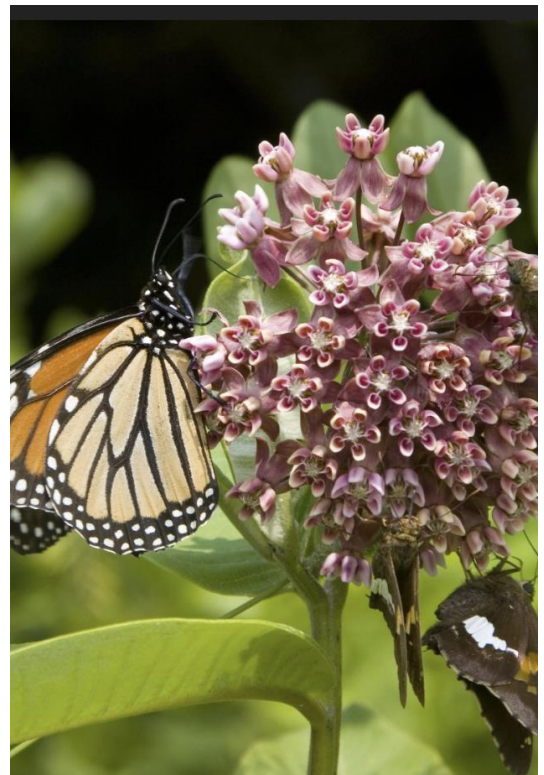

Milkweed, Common

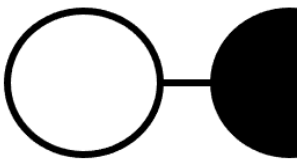

Asclepias syriaca

\$6 / 3.5 in. pot

- Benefits bees and butterflies. Host to Monarch caterpillar.
- Deer resistant
- Blooms: July - August
- Full sun to part shade
- Soil: Medium wet to dry
- Height: 3 – 5 feet
- Spread: 8 – 12 inches

Milkweed, Poke

Asclepias exaltata

\$6 / 3.5 in. pot

Benefits bees and butterflies. Host to
Monarch caterpillar.

Deer resistant

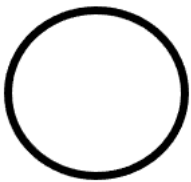

Blooms: June - July

Part shade

Soil: Medium wet to medium dry

Height: 2 – 6 feet

Spread: 1 – 2 feet

Milkweed, Prairie

Asclepias sullivantii

\$6 / 3.5 in. pot

Benefits bees and butterflies. Host to
Monarch caterpillar.

Deer resistant

Blooms: June - August

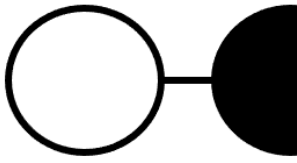

Full sun

Soil: Medium to medium wet

Height: 1 – 3 feet

Spread: 12 inches

Milkweed, Rose

Asclepias incarnata

\$6 / 3.5 in. pot

Benefits bees and butterflies. Attracts hummingbirds. Host to Monarch caterpillar.

Deer resistant

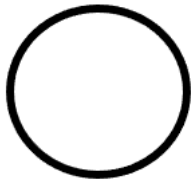

Blooms: July - August

Full sun to part shade

Soil: Wet to medium

Height: 3 – 4 feet

Spread: 3 feet

Milkweed, Showy

Asclepias speciosa

\$6 / 3.5 in. pot

Benefits bees and butterflies. Host to Monarch caterpillar.

Deer resistant

Blooms: June - August

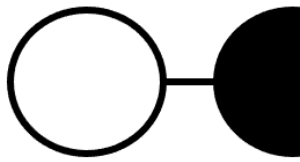

Full sun

Soil: Medium to dry

Height: 2 – 4 feet

Spread: 1 – 2 feet

Milkweed, Spider

Asclepias viridis

\$6 / 3.5 in. pot

Benefits bees and butterflies. Host to Monarch caterpillar.

Deer resistant

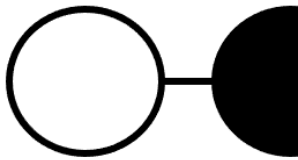

Blooms: May - June

Full sun to part shade

Soil: Medium dry to dry

Height: 1.5 - 2 feet

Spread: 2 feet

Milkweed, Whorled

Asclepias verticillata

\$6 / 3.5 in. pot

Attracts bees, butterflies and other pollinators. Host to Monarch butterfly.

Attracts hummingbirds.

Deer resistant

Blooms: July - September

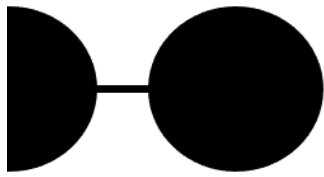

Full sun to part shade

Soil: dry to well-drained

Height: 1 - 3 feet

Spread: 1 - 2 feet

Mint, Hairy Wood

Blephilia hirsuta

\$6 / 3.5 in. pot

Benefits bees and other pollinators.

Deer resistant

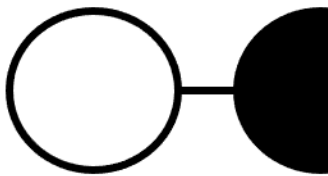

Blooms: June - September

Part shade to shade

Soil: Medium to medium wet

Height: 1 - 3 feet

Spread: 10 – 18 inches

Mint, Mountain

Pycnanthemum virginianum

\$6 / 3.5 in. pot

Benefits bees, butterflies and other pollinators.

Deer resistant

Blooms: June - September

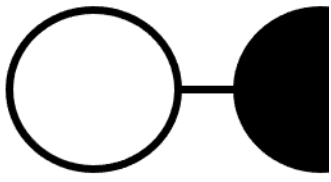

Full sun to part shade

Soil: Medium dry to wet

Height: 3 - 4 feet

Spread: 2- 4 feet

Mint, Slender Mountain

Pycnanthemum tenuifolium

\$6 / 3.5 in. pot

Benefits bees, butterflies and other pollinators.

Deer resistant

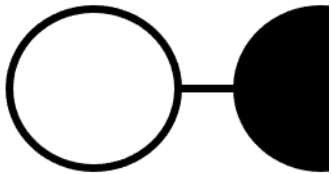

Blooms: June - September

Full sun to part shade

Soil: Medium dry to medium wet

Height: 2 - 3 feet

Spread: 6 to 12 inches

Monkey Flower

Mimulus ringens

\$6 / 3.5 in. pot

Attracts butterflies and hummingbirds;
host plant for some butterflies

Deer resistant

Blooms: May - July

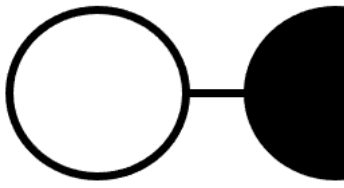

Full sun to part shade

Soil: Moist to wet, well drained

Height: 2 - 4 feet

Spread: 1 foot

Nodding Onion

Allium cernuum

\$6 / 3.5 in. pot

Benefits bees

Deer resistant

Blooms: June - August

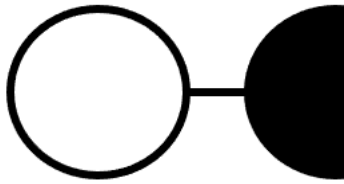

Full sun to part shade

Soil: Medium wet to medium dry;

grows in clay and gravel

Height: 1 – 2 feet

Spread: 6 – 8 inches

Obedient Plant

Physostegia virginiana

\$6 / 3.5 in. pot

Benefits bees, butterflies and hummingbirds

Deer resistant

Blooms: June - August

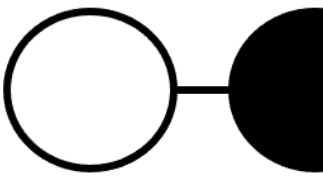

Full sun to part shade

Soil: Medium to wet

Height: 1 – 4 feet

Spread: 2 - 3 feet

Prairie Sundrops

Oenothera pilosella

\$6 / 3.5 in. pot

Benefits bees & other insects

Spreads readily

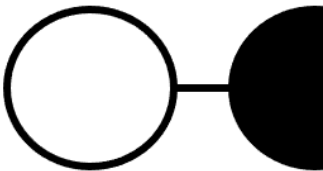

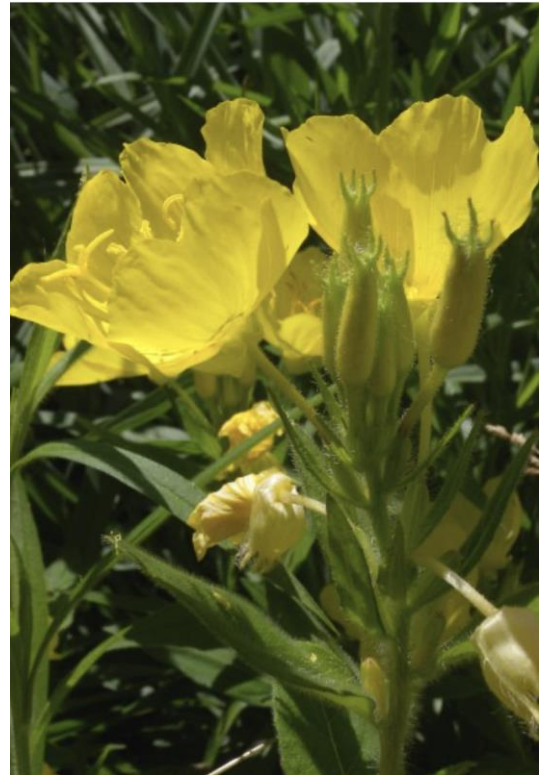

Blooms: May to June

Full sun to part shade

Soil: Medium wet to medium dry

Height: 1.5 – 2 feet

Spread: 18 – 24 inches

Prickly Pear Cactus

Opuntia humifusa

\$6 / 3.5 in. pot

Edible plant that provides food and protection for wildlife; though the spines can sometimes be deterrents, deer actually like to eat them.

Blooms: June - July

Full sun to part shade

Soil: Dry

Height: 6 inches – 1 foot

Spread: 18 – 24 inches

Royal Catchfly

Silene regia

\$6 / 3.5 in. pot

Attracts butterflies & hummingbirds

Deer resistant

Blooms: July - August

Full sun to part shade

Soil: Average, well-drained

Height: 2 - 4 feet

Spread: 1.5 - 2 feet

Sunflower, Early

Heliopsis helianthoides

\$6 / 3.5 in. pot

Beneficial to bees, butterflies & other pollinators

Blooms: June - August

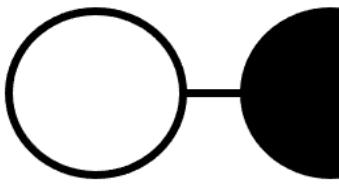

Full sun to part shade

Soil: Medium wet - medium dry

Height: 3 - 5 feet

Spread: 1 - 3 feet

Sunflower, Western

Helianthus occidentalis

\$6 / 3.5 in. pot

Beneficial to butterflies & other pollinators. Host to Checkerspot butterflies.

Less susceptible to deer than some sunflowers, but still medium browsed

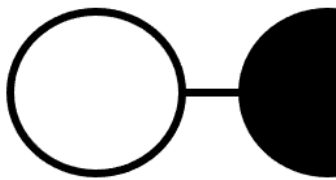

Blooms: July - September

Full sun to part shade

Soil: Medium to dry

Height: 2 - 3 feet

Spread: 18 inches

Swamp Rose Mallow

Hibiscus moscheutos

\$15 / 1 Gallon pot

\$6 / 3.5 inch pot

Benefits pollinators; attracts butterflies and hummingbirds

Blooms: July– September

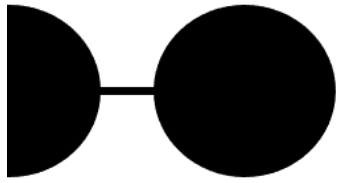

Full sun to part shade

Soil: Wet to medium wet

Height: 3 – 6 feet

Spread: 2 feet

Tall Bellflower

Campanula americana

\$6 / 3.5 in. pot

Primarily pollinated by long-tongued
bees

Self-sowing biennial

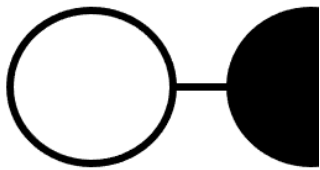

Blooms: July– October

Part shade to shade

Soil: Medium wet to medium dry

Height: 3 – 6 feet

Spread: 1 - 2 feet

Tall Coreopsis (aka

Tall Tickseed)

Coreopsis tripteris

\$6 / 3.5 in. pot

Attracts birds and butterflies

Deer resistant

Blooms: July– October

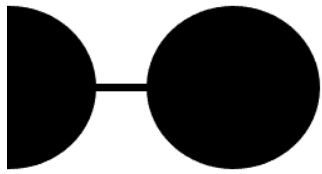

Full sun to part shade

Soil: Medium wet to medium dry

Height: 3 – 7 feet

Spread: 2 - 6 feet

White Snakeroot

Ageratina altissima

\$6 / 3.5 in. pot

Because it blooms so late, this is an important source of nectar for all kinds of insects in the fall.

Deer resistant

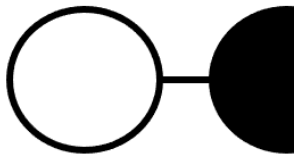

Blooms: September to frost

Part shade to shade

Soil: Medium wet to medium dry

Height: 2 – 3 feet

Spread: 2 – 3 feet

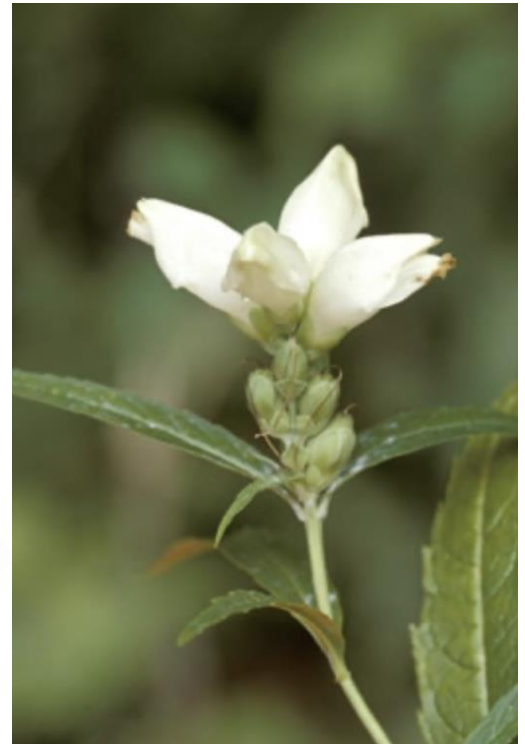

White Turtlehead

Chelone glabra

\$6 / 3.5 in. pot

Attracts butterflies and bees (esp. bumblebees) and hummingbirds;
Host plant for Baltimore Checkerspot butterfly

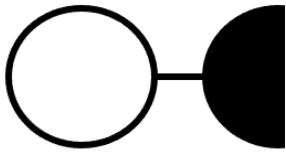

Blooms: August - September

Full sun to part shade

Soil: moist to wet average soil

Height: 2 – 4 feet

Spread: 2 – 3 feet

White Wild Indigo

Baptisia alba

\$6 / 3.5 in. pot

Benefits butterflies and bees.

Deer resistant

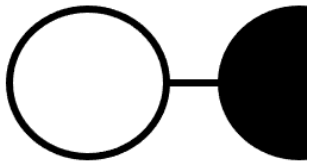

Blooms: June to July

Full sun to part shade

Soil: Medium wet to medium dry

Height: 3 – 4 feet

Spread: 3 – 4 feet

Whorled Rosinweed

Silphium trifoliatum

\$6 / 3.5 in. pot

Beneficial to bees, favored by goldfinches.

Deer resistant

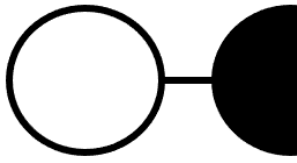

Blooms: July - September

Full sun to part shade

Soil: Medium wet to medium dry

Height: 4 – 5 feet

Spread: 3 – 4 feet

Wild Bergamot (aka Lavender Bee Balm)

Monarda fistulosa

\$6 / 3.5 in. pot

Benefits bees, bumblebees, butterflies
attracts hummingbirds

Deer resistant

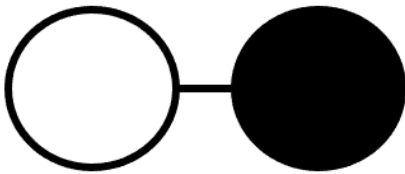

Blooms: June, July, August

Full sun to part shade

Soil: Average well-drained; once established, drought tolerant

Height: 2-4 feet

Spread: 36 inches

Wild Columbine

Aquilegia canadensis

\$6 / 3.5 in. pot

Benefits bees, bumblebees, butterflies;
attracts hummingbirds

Deer resistant

Blooms: May - June

Full sun to full shade

Soil: Dry to average, well-drained

Height: 12 inches

Spread: 12 inches

Wild Ginger

Asarum canadense

\$6 / 3.5 in. pot

Host plant to some caterpillars.

Deer resistant

Similar to culinary ginger,
but does not survive cooking

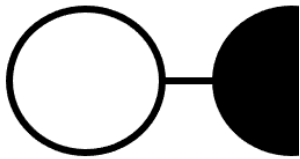

Blooms: April - June

Shade

Soil: Rich, medium wet

Height: 6 -- 8 inches

Spread: 12 – 16 inches

Wild Hyacinth

Cammasia scilloides

\$15 / 1 gallon pot

Attracts bees & butterflies

Bulbs are edible

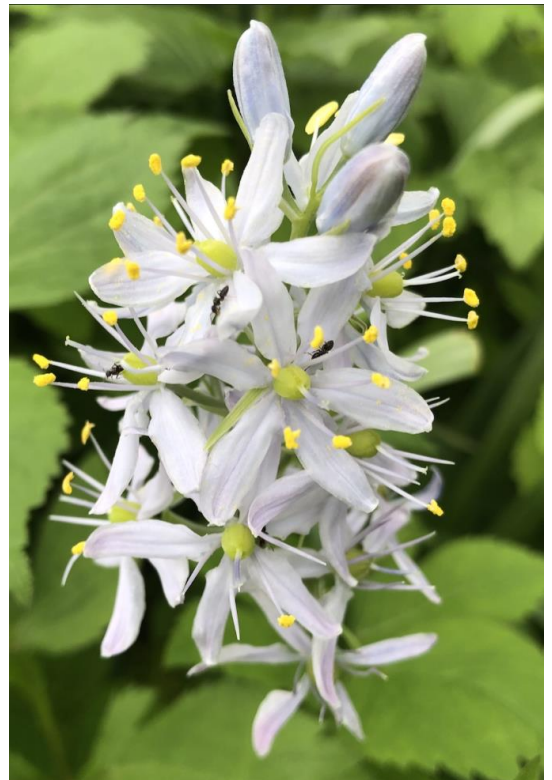

Blooms: April - May

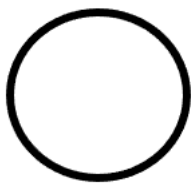

Full sun to part shade

Soil: Medium wet to medium dry

Height: 1 – 3 feet

Spread: 1 – 2 feet

Wild Petunia, Hairy

Ruellia humilis

\$6 / 3.5 in. pot

Attracts hummingbirds, bees & butterflies

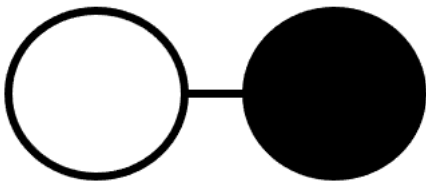

Blooms: April - May

Full sun

Soil: Medium to dry, sandy to loam

Height: 1 foot

Spread: 1.5 – 2 feet

Wild Petunia, Smooth

Ruellia strepens

\$6 / 3.5 in. pot

Attracts hummingbirds & butterflies

Blooms: May - September

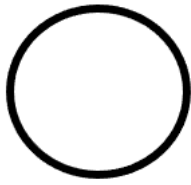

Full sun to shade

Soil: Medium wet to medium, rocky or loamy

Height: 16 – 36 inches

Spread: 12 – 18 inches

Wild Quinine

Parthenium integrifolium

\$6 / 3.5 in. pot

Attracts butterflies and other pollinators

Deer resistant

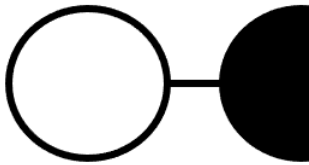

Blooms: June - September

Full sun

Soil: Medium to medium wet, well-drained

Height: 2 – 4 feet

Spread: 1 – 2 feet

Wild Senna

Senna hebecarpa

\$6 / 3.5 in. pot

Benefits bees, butterflies, other pollinators, beneficial insects; host for some butterfly species

Deer resistant

Blooms: July - August

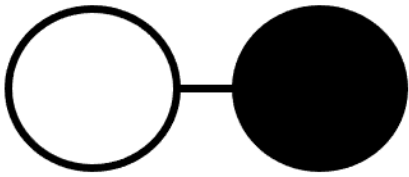

Full sun to part shade

Soil: Medium to medium wet clay

Height: 3 – 5 feet

Spread: 2 – 3 feet

Woodland Stonecrop

Sedum ternatum

\$6 / 3.5 in. pot

Attracts butterflies and beneficial insects

Deer resistant

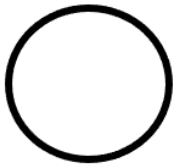

Blooms: April - June

Full sun to shade

Soil: Medium wet to medium dry, loamy

Height: 3 – 6 inches

Spread: 6 – 9 inches

Yarrow, Common

Achillea millefolium

\$6 / 3.5 in. pot

Attracts bees, butterflies and other pollinators

Deer resistant

Blooms: June - September

Full sun

Soil: Medium wet to medium dry, loamy

Height: 2 – 3 feet

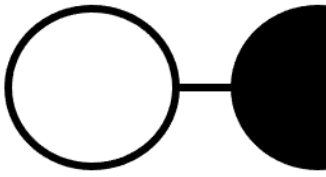

Spread: 1 foot

Grasses & Sedges

These are in 3.5" or
5 " Pots

Indian Grass

Sorghastrum nutans

\$6 / 3.5 in. pot

Attracts pollinators and birds and provides shelter for wildlife

Deer resistant

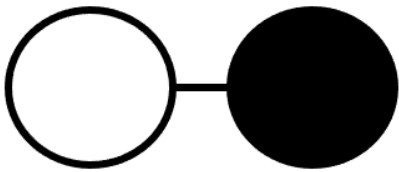

Blooms: August - September

Full sun to part shade

Soil: Medium to dry

Height: 3 – 7 feet

Spread: 2 – 3 feet

Pennsylvania Sedge

Carex pensylvanica

\$6 / 5 in. pot

Supports dozens of butterfly and moth species

Deer resistant

Good lawn alternative; forms dense mat

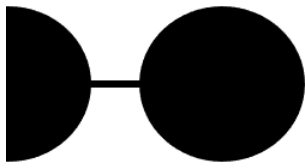

Blooms: April - June

Full sun to shade

Soil: Medium wet to dry

Height: 8 inches

Pretty Sedge

Carex woodii

\$6 / 5 in. pot

Some small wildlife and birds eat the seeds

Deer resistant

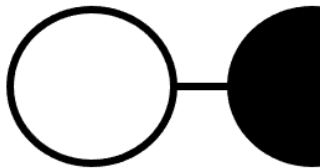

Blooms: April - May

Part shade to shade

Soil: Moist loamy

Height: 6 – 12 inches

Spread: 6 – 12 inches

Purple Lovegrass

Fragrostis spectabilis

\$6 / 5 in. pot

Supports dozens of butterfly and moth species

Deer resistant

Blooms: July - August

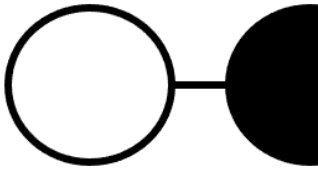

Full sun to part shade

Soil: Dry

Height: 1 – 3 feet

Spread: 1 – 3 feet

Sideoats Grama

Bouteloua curtipendula

\$6 / 3.5 in. pot

Hosts some moth larvae

Deer resistant

Good for erosion control

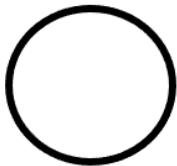

Blooms: August - September

Full sun to part shade

Soil: Medium to dry

Height: 2 feet

Spread: 1 – 2 feet

Sweet Flag

Acorus americana

\$6 / 3.5 in. pot

Supports some beetles

Deer resistant

Clumps should be divided every few years

Blooms: May - July

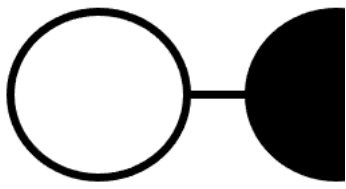

Full sun

Soil: Medium wet to wet

Height: 24 – 30 inches

Spread: 18 – 24 inches

Upright Sedge

Carex stricta

\$6 / 5 in. pot

Once it forms dense clumps, provides shelter for small mammals, insects and birds

Deer resistant

Good ground cover for shady areas

Blooms: June - July

Full sun to part shade

Soil: Moist, well-drained

Height: 2 – 4 feet

Spread: 2 feet

Trees & Shrubs

pages 52-68

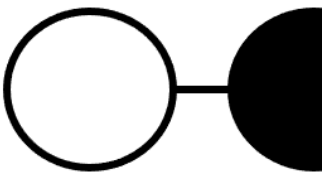

These are in 1 to 3 gallon pots
or one of the following:

Small treepot

Tall treepot

Birch, Yellow

Betula alleghaniensis

\$15 / 2 gallon pot

Benefits songbirds, gamebirds,
insect

pollinators and small mammals

Growth rate: Moderate

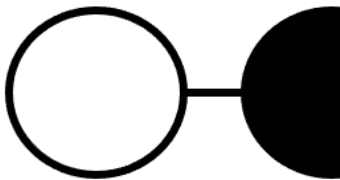

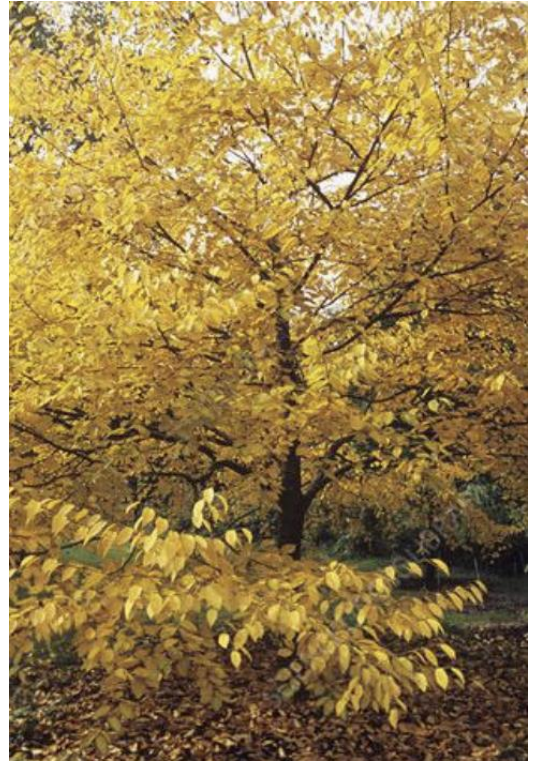

Blooms: April – June

Full sun to part shade

Soil: Rich, medium to wet

Height: 60 – 70 feet

Spread: 60 – 70 feet

Black Chokeberry

Aronia melanocarpa

\$25 / 3 gallon pot

Fruit benefits birds and other wildlife;

flowers attracts pollinators

Berries edible for humans

Blooms: May

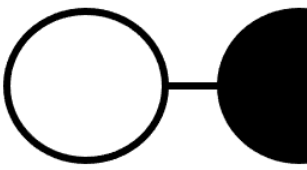

Full sun to part shade

Soil: Wet to dry clay, sand, loam

Height: 4 -6 feet

Spread: 3 -6 feet

Blackgum

Nyssa sylvatica

\$10 / small treepot

Habitat for wildlife, particularly birds,
who eat its bluish purple berries

Slow growing

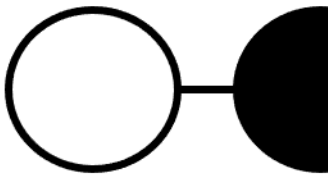

Blooms: May - June

Full sun to part shade

Soil: Medium to wet

Height: 30 – 50 feet

Spread: 20 – 30 feet

Buttonbush

Cephalanthus occidentalis

\$15 / 1 gallon pot

Benefits bees, butterflies, other
pollinators and birds

Blooms: June - August

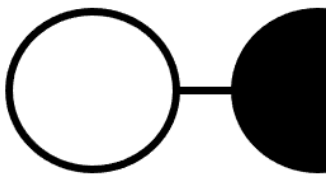

Full sun to part shade

Soil: Medium wet to wet ; used for
erosion control

Height: 5 -12 feet

Spread: 4 – 8 feet

Crabapple, Sweet

Malus coronaria

\$10 / small treepot

Benefits butterflies and birds; cross-pollinates some apple varieties

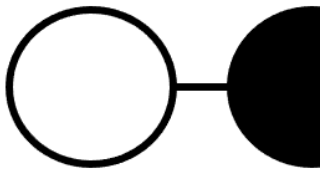

Blooms: May - June

Full sun to part shade

Soil: Moist, loamy

Height: 15 – 30 feet

Spread: 15 feet

Cranberry, Highbush

Viburnum opulus var. americanum

\$15 / tall treepot

Attracts bees, butterflies and other pollinators in the spring; fruits eaten by birds and some mammals in the fall

Not a true cranberry

Blooms: April - May

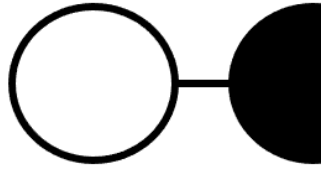

Full sun to part shade

Soil: Medium

Height: 8 - 12 feet

Spread: 10 feet

Dogwood, Flowering

Cornus florida

\$15 / 1 gallon pot

Benefits birds, pollinators, other wildlife
such as squirrels

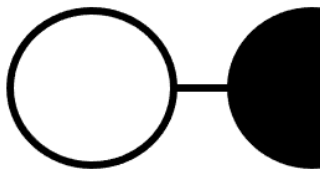

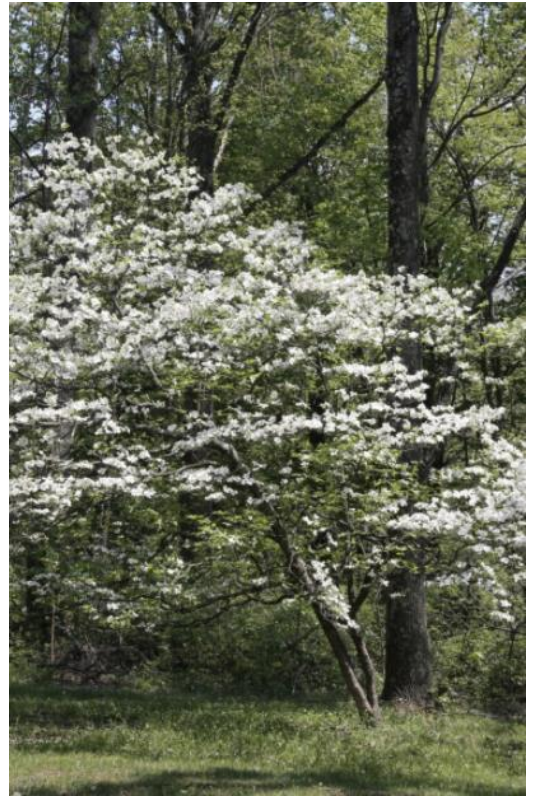

Red fruits

Blooms: April - May

Soil: Medium; rich, well-drained

Height: 5 -12 feet

Spread: 15 -20 feet

Dogwood, Gray

Cornus racemosa

\$15 / tall treepot

Benefits birds, pollinators, other wildlife

Clusters of white fruit

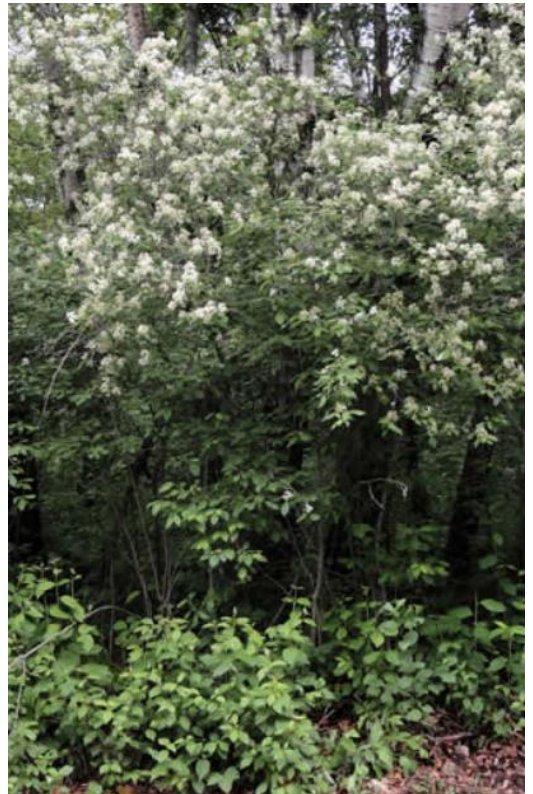

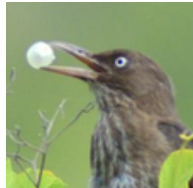

Blooms: May - June

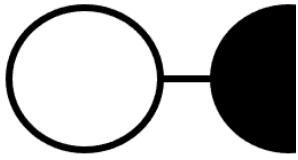

Full sun to part shade

Soil: Medium

Height: 10 - 15 feet

Spread: 10 - 15 feet

Dogwood, Red Osier

Cornus sericea

\$15 / tall treepot

Benefits birds, butterflies and mammals;

host plant for Spring Azure butterfly

Pea-sized white berries

Fast growing; winter interest

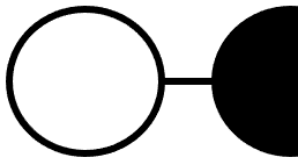

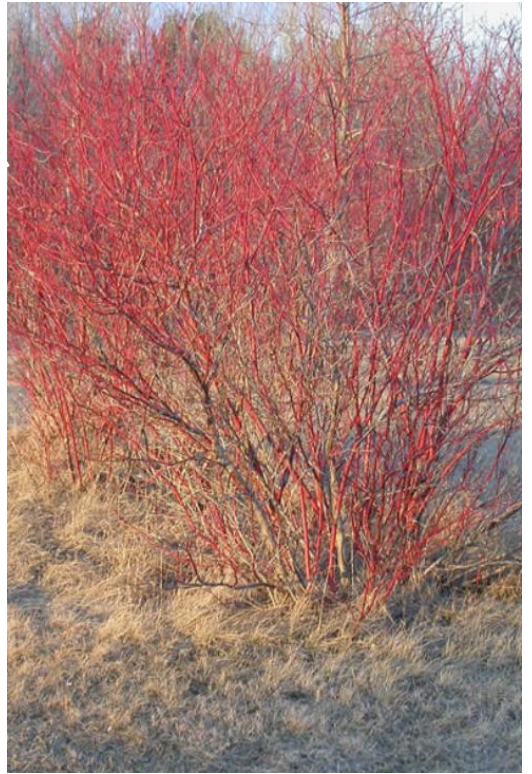

Blooms: May – June

Full sun to part shade

Soil: Moist to medium, well-drained

Height: 6 -12 feet

Spread: 10 feet

Elderberry, American

Black

Sambucus nigra ssp. canadensis

\$15 / tall treepot

Primarily benefits birds, which love the

berries; flowers attract pollinators

Fruits and flowers may both be

consumed by humans, but berries

should be cooked

Blooms: May – July

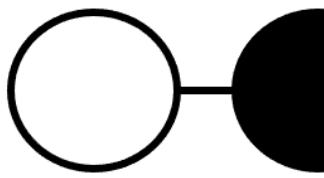

Full sun to part shade

Soil: Moist to medium,

Height: 5 – 12 feet

Spread: 6 – 10 feet

Filbert, American (aka Hazelnut)

Corylus americana

\$15 / 1 gallon pot

Benefits wildlife and humans

Fast growing

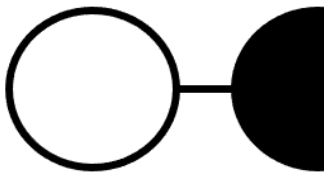

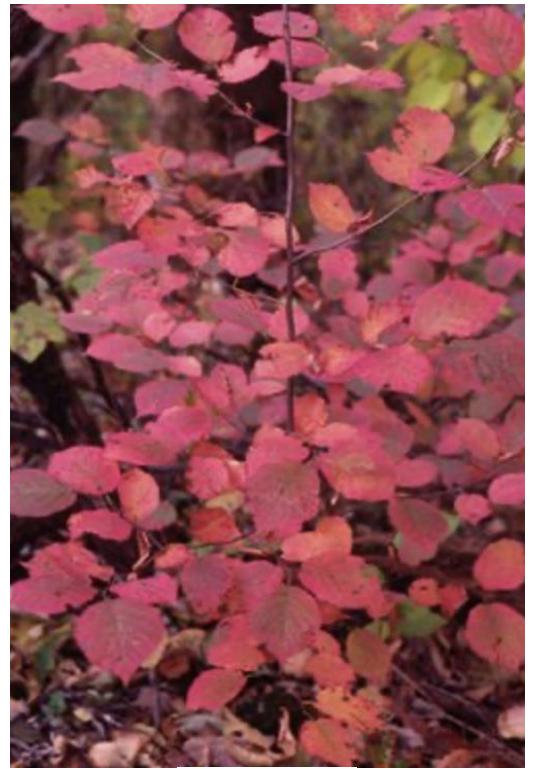

Plant at least two if you want nuts

Blooms: March

Soil: Moist to dry, well-drained

Height: 10 – 20 feet

Spread: 5 – 10 feet

Hickory, Bitternut

Carya cordiformis

\$10 / small treepot

Numerous mammals and birds
enjoy this tree's nuts, though, as the
name suggests, humans find them
rather bitter

Excellent shade tree

Blooms: April - May

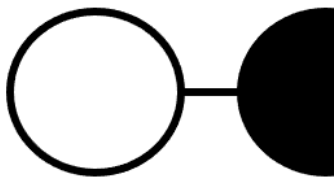

Full sun to shade

Soil: Medium to wet

Height: 60 -80 feet

Spread: 30 - 50 feet

Hickory, Shagbark

Carya ovata

\$10 / small treepot

Numerous mammals and birds enjoy this tree's nuts, which are also edible for humans

Excellent shade tree

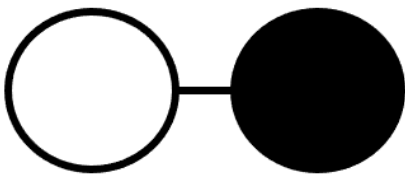

Blooms: April - May

Full sun to shade

Soil: Medium to moist, well-drained

Height: 70 -90 feet

Spread: 30 - 50 feet

Ninebark

Physocarpus opulifolius

\$15 / tall treepot

Benefits pollinators ; host to several moth species

Winter interest

Blooms: May – June

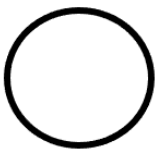

Full sun to shade

Soil: Dry to moist clay, sand, loam

Height: 5 -10 feet

Spread: 5 –10 feet

Oak, Northern Red

Quercus rubra

\$15 / 1 gallon pot

Attracts game birds, game animals, migrating birds, small mammals, though may not produce acorns for many years; oaks support many types of moths

Fast growing; good shade tree

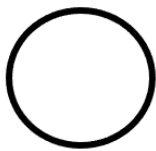

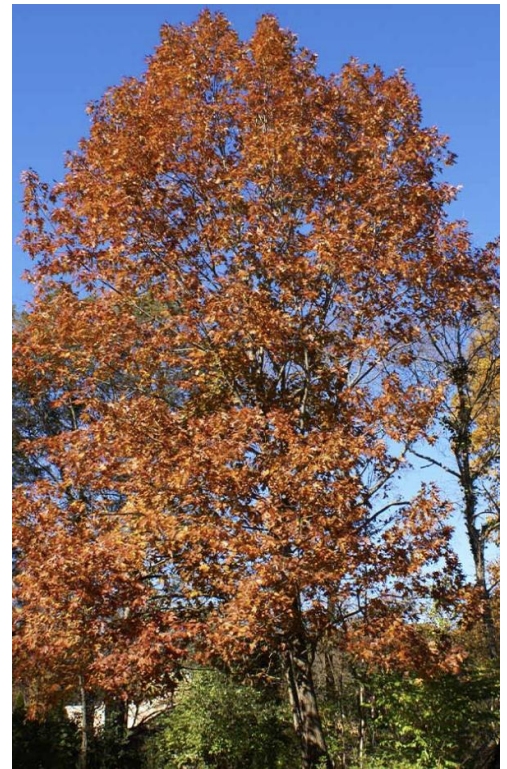

Blooms: May

Full sun

Soil: Medium to dry

Height: 50 – 75 feet

Spread: 50 – 75 feet

Oak, Scarlet

Quercus coccinea

\$15 / 1 gallon pot

Attracts mammals, migrating birds; oaks support many types of moths

Wonderful fall color

Blooms: April – May

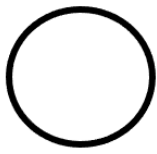

Full sun

Soil: Medium to dry

Height: 50 – 70 feet

Spread: 50 – 70 feet

Oak, Shingle

Quercus imbricaria

\$15 / 1 gallon pot

Attracts game birds, game animals,
migrating birds, small mammals;

oaks support many types of moths

Acorns are edible for humans, but only
after tannins are leached or
boiled out

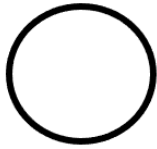

Blooms: April

Full sun

Soil: Medium

Height: 40 – 60 feet

Spread: 40 – 50 feet

Oak, Swamp White

Quercus bicolor

\$15 / 1 gallon pot

Attracts game birds, game mammals,
migrating birds, small mammals

Oaks support many types of moths

Blooms: April

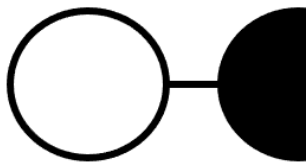

Full sun

Soil: Wet to medium

Height: 50 – 60 feet

Spread: 50 – 60 feet

Pawpaw

Asimina triloba

\$10 / small treepot

Attracts butterflies, pollinators,
songbirds and mammals

Genetically different pollen donor is
required for fruit production

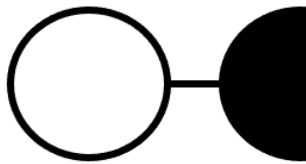

Blooms: April - May

Full sun to part shade

Soil: Wet to medium

Height: 15 – 30 feet

Spread: 20 – 30 feet

Persimmon, Common

Diospyros virginiana

\$15 / tall treepot

Birds often feed on the fruit, as do deer,
foxes, coyotes, raccoons and skunks

Edible fruit for humans

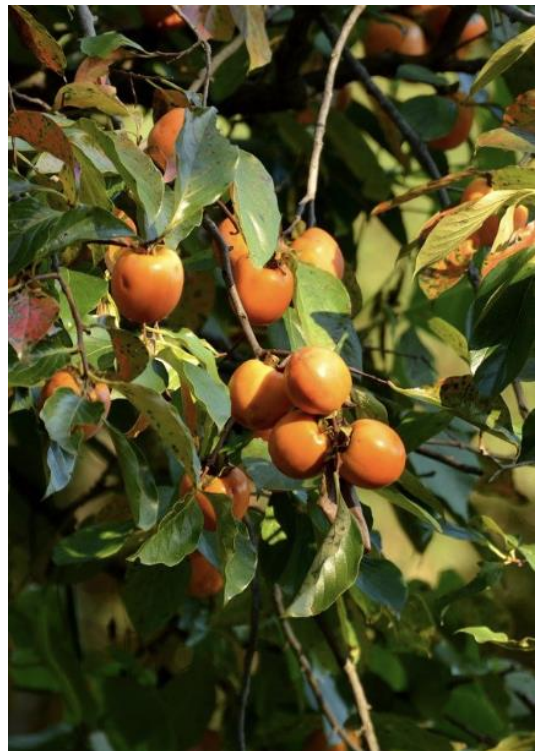

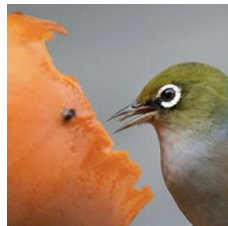

Blooms: May - June

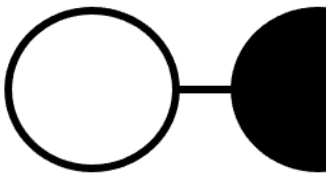

Full sun to part shade

Soil: Medium to dry

Height: 35 – 60 feet

Spread: 20 -- 30 feet

Plum, American

Prunus americana

\$15 / tall treepot

Attracts pollinators in the spring. Birds and small mammals feed on the fruit

Edible fruit

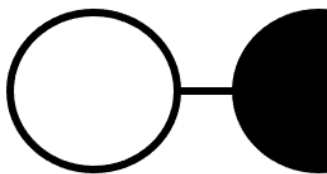

Blooms: March

Full sun to part shade

Soil: Medium to dry

Height: 15 – 25 feet

Spread: 15 – 25 feet

Serviceberry, Downy

Amelanchier arborea

\$10 / small treepot

Benefits bees and other insect pollinators; birds love the berries. Deer resistant.

Fruit edible for humans

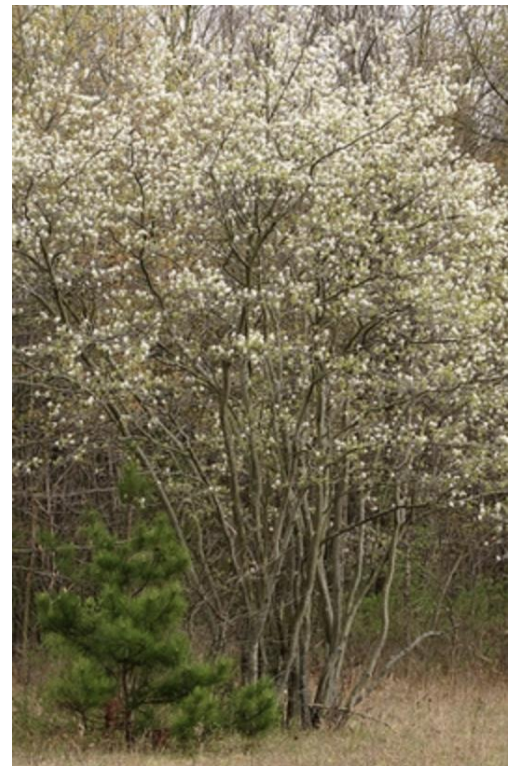

Blooms: March - April

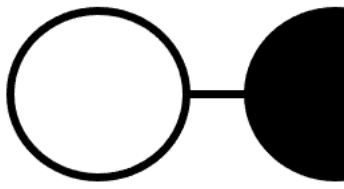

Full sun to part shade

Moisture: Medium

Height: 15 - 25 feet

Spread: 15 - 20 feet

Serviceberry, Juneberry

Amelanchier lamarkii

\$15 / 1 gallon pot

Benefits bees and other insect pollinators; birds love the berries. Deer resistant.

Fruit edible for humans

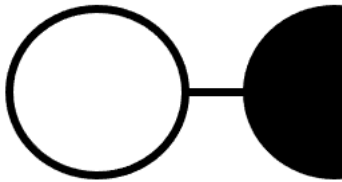

Blooms: April

Full sun to part shade

Moisture: Medium

Height: 15 – 25 feet

Spread: 15 - 25 feet

Serviceberry, Shadblow

Amelanchier canadensis

\$15 / tall treepot

Benefits bees and other insect pollinators; birds love the berries. Deer resistant.

Fruit edible for humans

Blooms: April - May

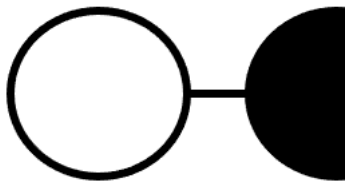

Full sun to part shade

Moisture: Medium

Height: 25 – 30 feet

Spread: 15 - 25 feet

Serviceberry, Smooth

Amelanchier laevis

\$25 / 3 gallon pot

Benefits bees and other insect pollinators; birds love the berries. Deer resistant

Rapid growth rate

Edible fruit

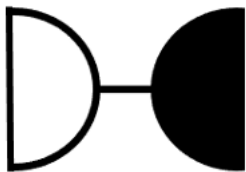

Full sun to part shade

Blooms: March

Soil: Medium to moist, well-drained

Height: 15 -- 40 feet

Spread: 15 – 25 feet

Spicebush

Lindera benzoin

\$10 / small treepot

Benefits birds, which eat their berries; host to Spicebush caterpillar

Moderate growth rate

Plants are either male or female - we cannot guarantee which you will get

Part sun to part shade

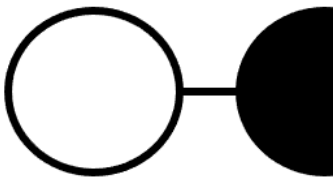

Blooms: March

Soil: Medium to moist, well-drained

Height: 6 -12 feet

Spread: 6 -12 feet

Sumac, Smooth

Rhus glabra

\$25 / 3 gallon pot

Bees and other insects obtain nectar and pollinate the plants; several species of birds eat berries ; edible berries have medicinal uses
Both male and female plants needed for fruiting ;
we can't guarantee which you will get
Good substitute for invasive Burning Bush

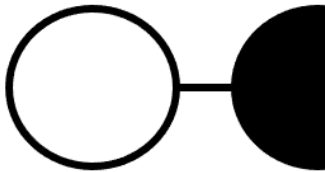

Full sun to part shade

Blooms: June- July

Soil: Medium to dry

Height: 9 – 15 feet

Spread: 9 – 15 feet

Sumac, Staghorn

Rhus typhina

\$15 / tall treepot

Bees and other insects obtain nectar and pollinate the plants; several species of birds eat the berries; mammals browse the foliage
Edible berries have medicinal uses

Winter interest

Full sun to part shade

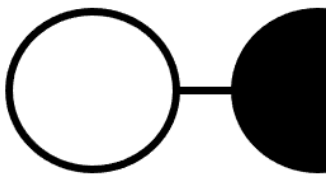

Blooms: June- July

Soil: Medium to dry

Height: 15 – 25 feet

Spread: 20 – 30 feet

Viburnum, Nannyberry

Viburnum lantago

\$15 / 1 gallon pot

White flowers in spring attract pollinators; esp. some native bees; host to Blue Azure butterfly

Deep blue fruit clusters with white coating ripen in late fall, providing food for birds

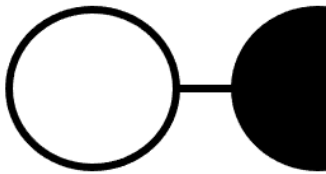

Fruit production will be better if a similar variety is planted nearby

Full sun to part shade

Blooms: May

Soil: Moist to medium

Height: 6 – 15 feet

Willow, Prairie

Salix humilis

\$15 / tall treepot

Bees gather nectar to make high quality honey; larval host for butterflies; birds use for shelter; rabbits and deer eat the twigs

Full sun to part shade

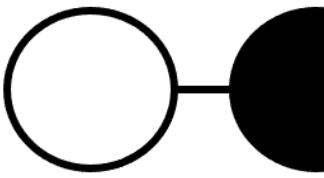

Blooms: April - May

Soil: Medium to dry

Height: 4 – 9 feet

Spread: 4 – 8 feet

Willow, Pussy

Salix discolor

\$15 / tall treepot

Benefits bees, butterflies, songbirds
and small mammals

Deer resistant

Fast growing but short-lived

Plants are either male or female - we
cannot guarantee which you will get

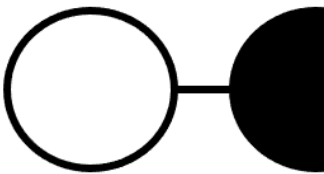

Full sun to part shade

Blooms: February - April

Soil: Medium to wet, well-drained

Height: 6 -15 feet

Spread: 4 -12 feet

Willow, Sandbar

Salix interior

\$15 / tall treepot

Hosts a variety of butterflies and moths

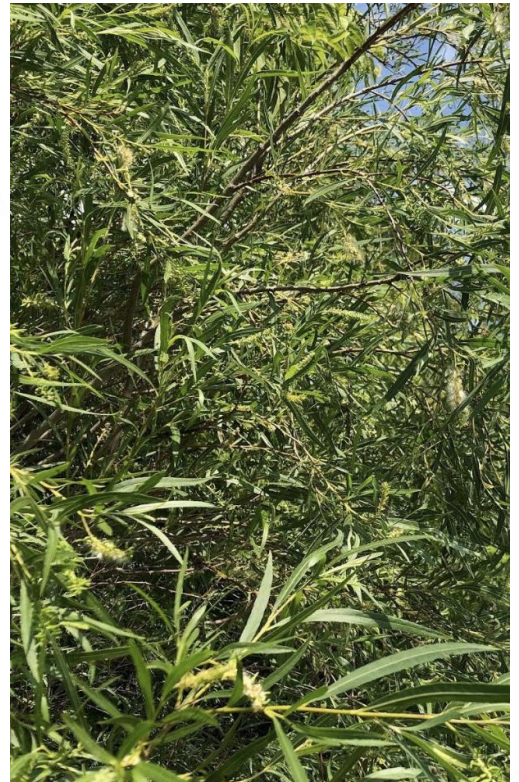

Can form dense thickets in wet areas

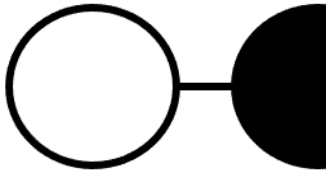

Full sun to part shade

Blooms: May - June

Soil: Wet to medium

Height: 15 – 20 feet

Winterberry

Ilex verticillata

\$15 / 1 gallon pot

Fruit benefits birds and other wildlife, but can be poisonous to people and pets

Deer resistant.

Usable for a screen/border

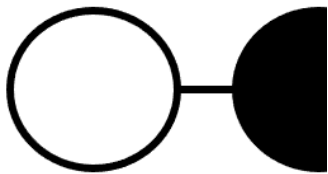

Blooms: June - July

Full sun to part shade

Soil: Wet to medium

Height: 6 – 12 feet

Spread: 6 – 12 feet

Witchhazel, Vernal

Hamamelis vernalis

\$10 / small treepot

Attracts pollinators and beneficial insects; seeds and flowers are eaten by wild turkey and grouse

Deer resistant

Winter interest

Blooms: October - November

Full sun to part shade

Soil: Moist to medium

Height: 6 – 10 feet

Spread: 6 – 8 feet
